PROFESSIONAL SUMMARY

Junior Full-Stack .NET Developer and Information Technology Institute (ITI) graduate with hands-on experience in ASP.NET Core and Entity Framework. Computer Science graduate of Alexandria University. Builds full-stack web applications with ASP.NET Core, Angular, and React on top of SQL Server, with a focus on clean, readable code.

SKILLS & TOOLS

- **Front-End:** HTML5, CSS3, JavaScript, Bootstrap, jQuery, Tailwind, Angular, React
- **Back-End:** C#, ASP.NET Core, Entity Framework, PHP
- **Databases:** Microsoft SQL Server, T-SQL, Stored Procedures, Database Design
- **Tools & Platforms:** Git, GitHub, Visual Studio, Visual Studio Code, Report Builder
- **Concepts:** OOP, SOLID Principles, RESTful APIs, MVC Pattern, Agile/Scrum, SDLC
- **Personal Skills**: Problem Solving, Technical Communication, Time Management, Presentation Skills, Teamwork, Adaptability, Attention to Detail, Critical Thinking, Self-Learning

CERTIFICATIONS

- Front-End Development - Route
- Front-End Development with HTML, CSS & JavaScript - Information Technology Institute (ITI)
- SQL Server Database - Information Technology Institute (ITI)

EXPERIENCE

Full-Stack Developer (Fulltime) TotalAir MEP Consulting Jan 2025 – present

- Build and maintain web applications with ASP.NET Core, Entity Framework, and SQL Server
- Develop front-end screens in Angular and React that consume REST APIs
- Write SQL queries and stored procedures and design database tables
- Work with the team using Git and follow OOP and SOLID principles in day-to-day code

EDUCATION

Bachelor of Science in Computer Science , Faculty of Science, Alexandria University
Graduation year : 2024

Graduation Project “X School” AI-Powered Parent Portal

- Built a full-stack web platform that helps parents find and compare schools from a database of 100+ institutions, using a CNN model for the recommendations. Parents can filter by academic, social, and logistical criteria.
- Main features: school recommendations, enrollment document guides, activity listings, and advanced filtering.
- The CNN classification model, trained on real institutional data, reached 85%+ accuracy in school matching.
- Presented the model output through a simple interface so parents without a technical background could use it.
- Worked on the whole project, from collecting the dataset and training the model to connecting it with the front end.

INTERNSHIP

Full-Stack .NET Intensive Bootcamp (Internship) Information Technology Institute (ITI)
Jan 2026 – July 2026

- Enrolled in ITI's intensive Full-Stack .NET track, covering ASP.NET Core, Entity Framework, SQL Server, and front-end development.
- Built several projects during the track covering both back-end and front-end work.

Front-End Projects

1. BookHaven Store Live Demo

- Built a responsive online bookstore front end with 50+ product listings, search and filtering, a shopping cart, and a checkout page.
- Layout adapts to mobile, tablet, and desktop screens.

2. Swoo Tech-Mart Live Demo

- Built a tech products marketplace front end with 40+ product cards, filtering across 6 categories, and a responsive grid layout.
- Added 5+ interactive components using JavaScript and Bootstrap.
- Tested across browsers and designed mobile-first.

3. Paradise Hotel Pages Live Demo

- Built a 5-page hotel website: homepage, room listings (15+ rooms), amenities, gallery, and contact page.
- Reused 10+ CSS components across the pages to keep the design consistent.

Full-Stack Projects

4. Dar: Property & Building Management Platform Live Demo

- Built a SaaS property management platform for 500+ rental units, with modules for rent tracking, maintenance requests, lease contracts, and financial reporting.
- Automated invoice generation, annual rent increases, and unit lifecycle management.
- Built 3 role-based dashboards for Owners, Tenants, and HOA/Compound Managers, each limited to its own data.
- Built the Angular front end with 20+ reusable components, RxJS for data flows, and Tailwind CSS for styling.

5. STORIX: Multi-Brand Retail Management Platform Live Demo

- Built a multi-brand retail ERP with .NET 9, ASP.NET Core MVC, EF Core 9, and SQL Server using Clean Architecture.
- Developed 10+ modules including POS, Inventory, Catalog, Orders, Payments, and Promotions, with audit logging.
- Implemented role-based access control (SuperAdmin, BrandOwner, Manager, Cashier) with session-based context for POS workflows.
- Built the UI with Razor Views, Bootstrap 5, and jQuery, with validation on both client and server (FluentValidation + jQuery Unobtrusive).

6. Ganouby Perfumes: Perfume E-Commerce Website Live Demo

- Extended the original front-end version into a full-stack e-commerce site for a perfume brand with 30+ products and category navigation.
- Built the back end with ASP.NET Core and SQL Server to store products and categories and serve them through a REST API.
- Connected the front end to the API so products load from the database instead of static files.
- Kept the CSS animations and deferred asset loading from the first version.
