PROFESSIONAL SUMMARY

Junior .NET Developer and Information Technology Institute (ITI) graduate with hands-on experience in ASP.NET Core and Entity Framework. Computer Science graduate from Alexandria University. Skilled in full-stack web development, SQL Server, OOP, and RESTful APIs. Passionate about clean code, continuous learning, and collaborative problem-solving.

SKILLS & TOOLS

- **Front-End:** HTML5, CSS3, JavaScript, Bootstrap, jQuery, Tailwind, Angular
- **Back-End:** C# ,ASP.NET Core, Entity Framework, PHP
- **Databases:** Microsoft SQL Server, T-SQL, Stored Procedures, Database Design
- **Tools & Platforms:** Git, GitHub, Visual Studio, Visual Studio Code, Report Builder
- **Concepts:** OOP, SOLID Principles, RESTful APIs, MVC Pattern, Agile/Scrum, SDLC
- **Personal Skills :** Problem Solving , Technical Communication , Time Management, Presentation Skills, Teamwork

CERTIFICATIONS

- Front-End Development — Route
- Front-End Development with HTML, CSS & JavaScript — Information Technology Institute (ITI)
- SQL Server Database — Information Technology Institute (ITI)

EXPERIENCE

Network Engineer (Fulltime) TotalAir MEP Consulting 2023 – 2025

- Installed and maintained network infrastructure (routers, switches, firewalls)
- Provided technical support to staff, resolving hardware, software, and connectivity issues
- Managed LAN/WAN environments and remote access solutions
- Maintained network security policies and user access controls

EDUCATION

Bachelor of Science — Computer Science , Faculty of Science, Alexandria University

Graduation year : 2024

Graduation Project "X School" AI-Powered Parent Portal

- Architected and developed a full-stack AI-powered web platform leveraging deep learning and Convolutional Neural Networks (CNN), enabling parents to intelligently discover and match schools from a curated database of 100+ institutions based on fully customizable academic, social, and logistical criteria.
- Delivered 4 core features smart school recommendations, enrollment document guides, activity listings, and advanced filtering, reducing average school-search time by ~60%.
- Achieved 85%+ model accuracy in school-matching recommendations through CNN-based classification trained on real institutional data.
- Translated complex machine learning outputs into a clean, intuitive user interface, making AI-driven insights accessible to non-technical users (parents) without requiring any technical knowledge.
- Managed the full project lifecycle from dataset collection and model training to frontend integration and feature delivery demonstrating end-to-end ownership across ML, backend, and UI layers.

INTERNSHIP

Full-Stack .NET Intensive Bootcamp (Internship) Information Technology Institute (ITI)

2026 – Present

- Enrolled in ITI's intensive Full-Stack .NET track, covering ASP.NET Core, Entity Framework, SQL Server, and front-end development.
- Completed hands-on projects and real-world assignments reinforcing both back-end and front-end development skills.

Front-End Projects

1. BookHaven Store

- Developed a fully responsive online bookstore front-end with 50+ product listings, search and filter functionality, a shopping cart, and a streamlined checkout UI.
- Achieved full responsiveness across 3 breakpoints (mobile, tablet, desktop), improving usability for all screen sizes.

2. Ganouby Perfumes

- Designed and built an elegant e-commerce front-end for a perfume brand featuring 30+ product showcases, category navigation, and a polished visual identity.
- Reduced average page load perception through optimized CSS animations and deferred asset loading techniques.

3. Swoo Tech-Mart

- Created a tech products marketplace front-end with 40+ dynamic product cards, category filtering across 6 categories, and a responsive grid layout.
- Integrated 5+ interactive UI components using JavaScript and Bootstrap, cutting user navigation steps by ~30%.
- Ensured cross-browser compatibility and mobile-first design, delivering a seamless user experience across devices.

4. Paradise Hotel Pages

- Built a 5-page hotel website front-end including homepage, room listings (15+ rooms), amenities, gallery, and contact page with a hospitality-focused design.
- Standardized design across all pages using 10+ reusable CSS components, reducing styling inconsistencies and development time.

Full-Stack Projects

5. Dar — Property & Building Management Platform

- Built a SaaS property management platform supporting 500+ rental units with modules for rent tracking, maintenance workflows, lease contracts, and financial reporting.
- Automated invoice generation, annual rent escalation, and unit lifecycle management — reducing manual processing by 70%.
- Designed and implemented 3 role-based dashboards tailored for Owners, Tenants, and HOA/Compound Managers with scoped data access per role.
- Architected a modular Angular frontend with 20+ reusable components, reactive data flows via RxJS, and a consistent UI built on Tailwind CSS.

6. STORIX — Multi-Brand Retail Management Platform

- Built a multi-brand retail ERP using .NET 9, ASP.NET Core MVC, EF Core 9, and SQL Server following Clean Architecture principles.
- Developed 10+ domain modules including POS, Inventory, Catalog, Orders, Payments, and Promotions with full business logic and audit trail.
- Implemented scoped role-based access control (SuperAdmin, BrandOwner, Manager, Cashier) with session-based operational context for POS workflows.
- Designed responsive UI using Razor Views, Bootstrap 5, and jQuery with a custom brand theme and dual-layer validation (FluentValidation + jQuery Unobtrusive).

LANGUAGES

- **Arabic:** Native
- **English:** Very Good
